

PCB TERMINAL BLOCKS AND PLUGGABLE CONNECTORS

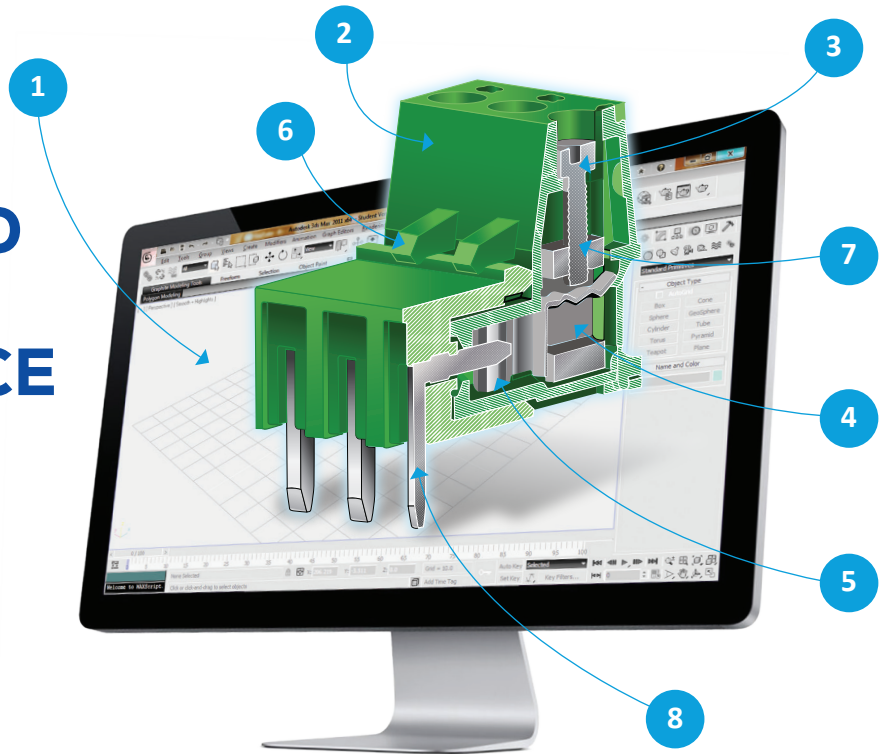

PRICE LIST
2024

MEGARADAR

RELIABLE AND SUPERIOR PERFORMANCE

manufactured by
MEGA RADAR.

1 Perfect Designs with CAD Programs

Millimetric designs that prevent errors that may occur in production and use.

2 Safety First!

Non-flammable Plastic: UL94 V0

V0 plastic, which extinguishes instantly in the 850-degree burning test, does not drip, does not emit toxic gas thanks its Halogen Free; provides long-lasting products and safe living spaces.

3 Durable Steel Screw

Screws reinforced with Zn+Cr+μ3 steel screw alloy against oxidation and corrosion are rustproof and resistant to screwdriver effects. Its teeth are always strong and its impact resistance is high.

4 Zinc Plated CK45 Squares and Lift System

While coating provides high strength, secure connection and safe use to the squares; lift system provides firm grip and practical use.

5 Silver Plated Brass Contact and Pin

High electrical conductivity and corrosion resistance make brass the most ideal material to be used in production. Silver plated brass contacts and pins produces the best possible result, thanks to silver's resistance to high currents, high conductivity and compatibility with soldering.

6 Reliable Locking System

Reliable interlocking provides firm grip and secure plugging.

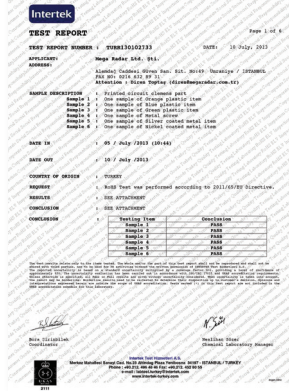

Thanks to its compact design, that does not create space loss even in the tightest spaces. Vibration resistance provides reliable connection even in harsh and shaky conditions.

7 Wide Contact-Pin Contact Point

2x0,98mm² large contact-pin contact point is resistant to high currents and provides high conductivity. Thanks to fast data transfer it prevents overheating.

8 Sweet-tight interlacing and Springiness

Thanks to sweet tight interlacing, it provides flexible and solid grip at the contact and pin junction. Thanks to its springiness, the product maintains its flexible holding feature in multiple inputs and outputs.
